SUMMARY

B.Tech CSE (AIML) student skilled in Python, AI/ML, computer vision, and deep learning. Experienced in developing AI-powered web apps, face detection systems, and recommendation engines. Certified in AI & ML from the Ministry of MSME, Govt. of India.

EDUCATION

- **Amarkanan Deshbandhu Vidyalaya (School)**
 - West Bengal Board of Secondary Education – 62 % Marks **March 2020**
 - West Bengal Higher Secondary Examinations – 85% Marks **April 2022**
- **Dr.B.C. Roy Engineering College, Durgapur**
 - B.Tech-Computer Science and Engineering (AIML) **October 2022 – Present**

TECHNICAL SKILLS

- **Languages:** Python, HTML, CSS, SQL
- **Frameworks:** Pandas, Numpy, Scikit-Learn, Tensor Flow, Matplotlib, Seaborn
- **Developer Tools:** VS Code, PyCharm, Jupyter-notebook, Google Colab

PROJECTS

- **AI Image Generation and Editing Web Application** 🔗 :- **August 2025 - Present**
Built a web-based AI application for image generation, enhancement, and editing using Streamlit and BRIA API.
Key Libraries: Streamlit, Pillow (PIL), NumPy, dotenv, requests, io, streamlit-drawable-canvas, BRIA API.
Functionality: Implemented multiple AI-driven image operations, including lifestyle shot generation, packshot creation, shadow addition, HD image upscaling, generative fill (inpainting), prompt enhancement, and object removal. Integrated BRIA API for advanced AI image generation and editing capabilities. Supported text-based and image-based prompt inputs for flexible user workflows.
- **Real time Face detection** 🔗 :- **June 2025 – June 2025**
Developed a real-time face detection application using OpenCV and Keras for image processing and classification.
Key Libraries: OpenCV, NumPy, scikit-learn, Keras with TensorFlow.
Functionality: Implemented live video feed processing using OpenCV to detect faces in real-time. Encoded and managed dataset labels using LabelEncoder from scikit-learn. Built a CNN model with layers such as Conv2D, MaxPooling2D, and Dense for facial recognition.
- **Book Recommender System** 🔗 :- **May 2025 – May 2025**
Developed a book recommendation web application using Flask and HTML for the user interface.
Key Libraries : Flask, HTML, pandas, NumPy, scikit-learn, pickle.
Functionality: Designed a **web**-based UI with HTML templates rendered via Flask. Serialized and loaded pre-trained models using pickle for efficient deployment. Allowed users to input book preferences and receive relevant recommendations in real time.

CERTIFICATIONS

- Complete hands-on machine learning and GenAI tutorial with data science, Tensorflow, GPT, OpenAI, and neural networks - Udemy
- Artificial Intelligence and Machine Learning from Central Tool Room & Training Centre (CTTC), Ministry of MSME, Govt. of India — Bhubaneswar Date Awarded: 30 July 2025
- Science Exhibition - 3rd Position
- Quiz Competition - 2nd Position
- 1 year Member in IEEE

INTRESTS

Photography & editing, Video editing, DaVinci Resolve, VN, CapCut
